

EVCO Recruiting

Renewable Energy

The Difference is your Advantage...

How are we different than a typical recruiting firm?

It is simple...we offer you more than just a resume. That sounds easy enough, but simply stated, not one recruiting source can match our combination of recruitment process, industry relationships and innovative technology.

As your recruiting partner, our flexibility offers you more choices and our flat rate fee structure offers predictability and cost savings!

The job boards give us enough candidates, why use EVCO?

Reviewing a flood of resumes and paperwork is both time consuming and cumbersome, not to mention the excessive costs and resources required to conduct effective candidate searches, write targeted job descriptions, place advertising, manage the selection process, and so on.

Receiving a hand picked collection of pre qualified, industry specific professionals that are ready to meet your team is Recruitment on Demand!

When you add up all the additional services we offer, including BigGreenBoard.com, Smart Seek, EVCO*direct*, Employease and our applicant tracking software, it is no wonder why we are the cost effective recruitment solution to the Renewable Energy industry!

How do you measure success?

When you are happy, we are successful! How do we measure happiness?

Three service drivers that we track and measure are:

- 1) Cost effectiveness: We ensure an immediate ROI and a cost savings of at least 50% over traditional search firms.
- 2) Efficient processes: We keep fees low by managing our efficiencies.
- 3) Quality of hire: By focusing 100% on the Renewable Energy industry, we spend our time and resources seeking out top industry talent and delivering this quality to your organization.

Do you offer project consultants and temp to hire staff?

Our service, Employease, was designed specifically for this purpose.

By handling all aspects of the employment relationship, including payroll processing, workers compensation coverage and offering our contractors fully customized health plans, we help you control COSTS and Eliminate RISKS.

You can utilize our service for interns, contract positions, trial period employment or as a part of your overall contingent workforce solution.

About Us

EVCO Recruiting has developed an aggressive recruiting formula, resulting in the creation of a high performance fully scalable, turn key recruiting solution for direct manufacturers, suppliers and indirect service providers within the Renewable Energy industry.
